

Product Information Sheet

Ceramic Fibre Board

Future Thermal ceramic board is manufactured from high quality unwashed ceramic fibers

Product Code:	FTB25
Temperature:	Up to 1260°C
Melting Point:	1800°C
Description:	Ceramic Fibre Board
Tensile strength:	>400kpa
Density:	200-240 kg/m ³
Width:	610mm
Thickness:	25mm
Length:	900mm

The information on this data sheet is strictly for guidance only and while provided in good faith, cannot be guaranteed. The company's products are used in a wide range of applications over which they have no control, therefore the company excludes all conditions of warranties whether expressed or implied as to the fitness of the product for any purpose. Customers must establish product suitability via their own tests.
